FITT startup Nanosafe launched an antiviral and antimicrobial water storage container under the brand name "AqCure"

AqCure is a patented technology in which active nano-copper is released in a sustainable manner from a polymer matrix. The released copper makes the outer and inner surface of the container antimicrobial and antiviral, reducing transmission of microbes upon direct contact, and making the stored water microbiologically safe. Additionally, the released copper in water is within permissible limits and thus fortifies stored water as copper is also an essential micronutrient, needed for growth. AqCure water containers have >99.99% antibacterial, >99.99% antifungal, and >99% antiviral activity tested as per ISO and ASTM standards. These containers are made from BPA/BPS-free high quality food grade polymers and are ideal for home and office use.... Source: Internal
